#### **DETAILED ACTION**

#### Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

## Information Disclosure Statement

2. The information disclosure statement filed on July 3, 2002 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

A copy of "New Version of Color Science Handbook 2<sup>nd</sup> Edition," is not in English and therefore not considered. Please provide a copy of this reference, if wanted to be considered by the examiner, in English.

- 3. The information disclosure statement (IDS) submitted on April 23, 2002 has been considered by the examiner. The submission is in compliance with the provisions of 37 CFR 1.97.
- 4. There are three references (application SN 09/987,779 (now, USPUB 2002/0060803); 09/624,376 (now US 6,687,988); 09/420,772 (now, USPUB 2003/0161530)) that were submitted in the original application. However, these did not appear on the form PTO-1449. These references have been considered and have been added on the form PTO-892 for the record.

### Claim Objections

5. Claim 6 is objected to because of the following informalities: Claim 6 lines 1-2 recites

"...wherein the combination of the color data..." Please note that "combination" is recited in claim 4 and

not claim 3. There is insufficient antecedent basis for this limitation in the claim. Perhaps, claim 6 oughtto depend on claim 4 and not claim 3. Appropriate correction is required.

# Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 7. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Hosaka (US 4,716,456).

With regard to **claim 1** Hosaka discloses an image processing apparatus comprising (col. 1 line 57 to col. 2 lines 1-3): a first acquisition section, arranged acquire color data of an object (col. 2 lines 62 to col. 3 lines 1-23); second acquisition section, arranged to acquire spectral distribution data on the basis of the configuration of spectral distribution data defined in accordance with the acquired color data (col. 4 lines 14-34); and a generator, arranged generate image data constructed by the acquired color data and the plurality of spectral distribution data (col. 7 lines 39-50; col. 8 lines 4-15 and col. 10 line 33 to col. 11 lines 1-65).

With regard to claim 2 Hosaka discloses an image processing apparatus (col. 1 line 57 to col. 2 lines 1-3) comprising: an input section, arranged to input image data constructed by color data and a plurality of spectral distribution data (Figure 1, document 2 being inputted; col. 2 lines 62 to col. 3 lines 1-23); and an estimator, arranged to estimate spectral distribution data of a total wavelength region on the basis of the configuration of the spectral distribution data defined in accordance with the color data (col. 4 lines 19-34, lines 43-54; col. 7 lines 7-45).

Claim 3 discloses limitations that are combined from claim 1 and 2 as disclosed above and the arguments are not repeated herein, but are incorporated by reference. Thus, arguments similar to that presented above for claims 1-2 are equally applicable to claim 3.

With regard to claim 4 Hosaka discloses combination of the spectral distribution data at col. 7 lines 27-48.

Application/Control Number: 10/006,724

Art Unit: 2621

With regard to claim 5 Hosaka discloses the configuration of the spectral distribution data defined by a spectral distribution defined in accordance with the color data (col. 4 lines 14-34).

With regard to claim 6 Hosaka discloses predetermining the color data and the configuration of the spectral distribution (col. 6 line 65 to col. 7 line 45).

With regard to claim 7 Hosaka discloses the configuration of the spectral distribution data being arbitrarily changeable (throughout the Hosaka's reference depending on which wavelength is being analyzed with reference to the relative sensitivity).

Claim 8 recites identical features as claim 1 except claim 8 is a method claim. Thus, arguments similar to that presented above for claim 1 is equally applicable to claim 8.

Claim 9 recites identical features as claim 2 except claim 9 is a method claim. Thus, arguments similar to that presented above for claim 2 is equally applicable to claim 9.

Claim 10 recites identical features as claim 3 except claim 10 is a method claim. Thus, arguments similar to that presented above for claim 3 is equally applicable to claim 10.

# Claim Rejections - 35 USC § 103

- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. Claims 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hosaka (US 4,716,456) in view of Kouzaki (US 5,633,953).

With regard to claim 11 Hosaka discloses the image processing method and an apparatus as disclosed above in claims 1 and 8 and the arguments are not repeated herein, but are incorporated by reference. Hosaka does not expressly disclose having a computer program product storing a computer

readable medium. Kouzaki discloses this at CPU 71 in Figures 4 and 15 and at col. 9 lines 64 to col. 10 line23. At the time of the invention, it would have been obvious to a person of ordinary skill in the art to combine the teaching of Kouzaki with Hosaka. The motivation for doing so is that not only having a computer program product storing a computer readable medium conventional in the art but to have it to execute the instructions in order to process the method as suggested by Kouzaki. Therefore, it would have been obvious to combine Kouzaki with Hosaka to obtain the invention as specified in claim 11.

Claim 12 recites identical features as claim 9. Thus, arguments similar to that presented above for claim 9 is equally applicable to claim 12.

Claim 13 recites identical features as claim 10. Thus, arguments similar to that presented above for claim 10 is equally applicable to claim 13.

#### Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 6,333,757 -- Method and apparatus for producing and displaying spectrally-multiplexed images of three-dimensional imagery for use in stereoscopic viewing thereof

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shefali D. Patel whose telephone number is 571-272-7396. The examiner can normally be reached on M-F 8:00am - 5:00pm (First Friday Off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Joseph Mancuso can be reached on (571) 272-7695. The fax phone number for the organization where
this application or proceeding is assigned is 571-273-8300.
